

AUORE FAVIER

BIOGRAPHY

1991

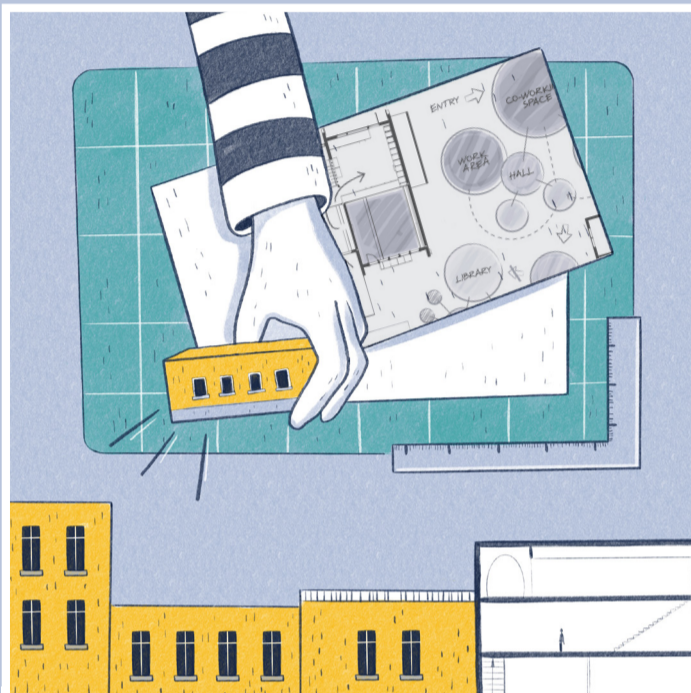

The birth of a dreamer

Born in the north-east of France, she was already a bookworm passionate about magic & fantasy with her head in the clouds and her hands ready to tinker.

2010 - First step for a storyteller

As a Summer Camp Animator, she puts her imagination to work for kids & youth, teaching them how to create worlds with three pieces of string and a mountain of cardboard...

her Architecture studies sharpened her eye for space...

... before the graphic and plastic arts took over.

2015 - Creative turning point

She turned to zero waste and, out of a desire to act, chose to transform our waste into meaningful works of art.

2016 - The creative adventure began! She launched her own company of poetic and upcycled creations. A bestiary to adopt, a universe to share. A tool for disseminating ideas and messages.

2021 Call of the North

Crossing the ocean, heading for the Yukon, new territory, new life, starting from scratch to build better!

2025 To infinity and beyond!

Creation of Papyery Moose, her own yukon company in which she bring together all her creative adventures.

This is just the beginning, imagination knows no boundaries!
